

RF::CEREB

THE CENTRAL INTELLIGENCE OF AUTOMATION

KEY BENEFITS

- Improved data accessibility & transparency
- Improved data traceability & consistency
- Simplified project preparation
- Efficient version control & change management
- Resilience to data changes

The smart data core of the RF::SUITE.

RF::CEREB serves as the brain of the EKS ecosystem. It connects all RF::SUITE modules, processes and analyzes data, and transforms complexity into clarity — enabling smarter, faster, and more reliable decisions.

INTEGRATION

In modern automation projects, data volume and complexity grow rapidly. RF::CEREB cleans up this mess by unifying information from simulation, control, and analysis into one consistent, intelligent data network. The result: transparent workflows, reduced errors, and a new level of efficiency across all systems.

EKS InTec GmbH

Driven by Innovation – Strong in Collaboration – Leading the Way in Automation
